Change Title: Reduction of desiccant pouches for Intel moisture sensitive desiccant packaged products.

Date of PCN Publication: October 25, 1999

Type of Change Notification:

FYI (for-your-information)

Key Characteristics of the Change:

Transport Media

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material: November 29, 1999

Date of First Availability of Post-Conversion Material: November 29, 1999

The date of "First Availability of Post-Conversion Material" is the earliest date that a customer may expect to receive the post converted product. This date is determined by the projected depletion of inventory at the time of the PCN publication. The depletion of inventory may be impacted by fluctuating supply and demand, therefore, customers should be prepared to receive the post converted product on this date, however, may continue to receive the pre converted product until the inventory is depleted.

Description of Change to the Customer:

Based on the improved Moisture Vapor Transmission Rate (MVTR), Intel will reduce the quantity of desiccant pouches used in packaging moisture sensitive product. Currently all moisture sensitive packages are using desiccant packing with 2 or 3 packs of desiccant pouches for absorbing moisture inside the Moisture Barrier Bag (MMB). Intel will utilize the formula found in the IPC¹/JEDEC² J-STD-033 "Standard for Handling, Packaging, Shipping and Use of Moisture/Reflow Sensitive Mount Devices," section 6.3.2.2, to calculate the correct amount of desiccant pouches per product.

Customer Impact of Change and Recommended Action:

Intel does not anticipate any customer impact as a result of this change.
