

(COTS) COMMERCIAL OFF-THE-SHELF 1.5 AMP POSITIVE  
ADJUSTABLE VOLTAGE REGULATOR IN TO-257 PACKAGE

Three Terminal, Precision Adjustable  
Positive Voltage Regulator In TO-257 Package

## FEATURES

- Built In Thermal Overload Protection
- Short Circuit Current Limiting

## DESCRIPTION

These three terminal positive regulators are supplied in hermetically sealed packages. All protective features are designed into the circuit, including thermal shutdown, current-limiting, and safe-area control. With heat sinking, these devices can deliver up to 1.5 amps of output current. The unit also features output voltages that can be fixed from 1.2 volts to 37 volts using external resistors.

## ABSOLUTE MAXIMUM RATINGS $T_c @ 25^\circ\text{C}$

### Power Dissipation

TO-257 . . . . .	.....	.....
. 20 W		
Input - Output Voltage Differential . . . . .	.....	40
V Operating Junction Temperature Range . . . . .	.....	- 55°C to + 150°C
Storage Temperature Range . . . . .	.....	- 65°C to + 150°C
Lead Temperature (Soldering 10 seconds) . . . . .	.....	.....
300°C Thermal Resistance, Junction to Case: . . . . .	.....	.....

Notes:

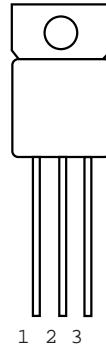

- 1 Load and Line Regulation are specified at a constant junction temperature. Pulse testing with low duty cycle is used. Changes in output voltage due to heating effects must be taken into account separately.
- 2 If not tested, shall be guaranteed to the specified limits.
- 3 The • denotes the specifications which apply over the full operating temperature range.
