

Multilayer Ceramic Chip Capacitors (For General Electronic Equipment)

Series: **ECJ**

■ Features

- Small in size and wide capacitance range
- Superior humidity characteristic and long life thanks to the monolithic construction
- Excellent solderability and resistance to soldering heat thanks to terminals with three layers of copper, nickel and solder
- Low self-inductance and excellent frequency characteristics

■ Recommended Applications

- **Class 1 (T.C. Type)**
Temperature compensations, tuned circuits and filter circuits, where low loss and high stability of capacitance and high insulation resistance are required
- **Class 2 (Hi-K Type)**
Coupling and By-pass, where low and high stability of capacitance are not so important

□: Capacitance tolerance code. : "□" for "K" or "M"

Packaging style code: "V", "F" and "Y" for taped version. (φ 180 reel, taping pitch: 4 mm)

Soldering method of dimension T > 1 mm: Do not use the flow soldering.
