- 30 dB Attenuation @ 1000 MHz (50  $\Omega$ )

## Description

M/A-COM's MA4P274-1225 is a wideband, lower insertion loss, high IP3, Quad PIN Diode  $\pi$ Attenuator in a low-cost, surface mount SOT-25 package. Four PIN Diodes in one package reduce design parasitics and improve circuit density.

These PIN Diode Attenuators perform well where RF Signal Amplitude Control is required in 50  $\Omega$  Handset Circuits and 75  $\Omega$  Broadband CATV Systems. Exceptional Insertion Loss, Attenuation Range, and IP3 at <10 mA bias make these devices suitable for better power level control in RF Amplifiers.
