  - Maximum value at nominal input voltage and full load.
  - Typical value at nominal input voltage and no load.
  - Single : Typical value at nominal input voltage and full load.  
Dual : Typical value at nominal input voltage and both outputs current are 7.5A.
  - Maximum output deviation is 10% inclusive of remote sense. If remote sense is not being used, the + sense should be connected to its corresponding +OUTPUT and likewise the -sense should be connected to its corresponding -OUTPUT.
  - Measured with a 1µF M/C and a 10µF M/C(for dual outputs) or 1µF M/C and a 10µF T/C(for single outputs)
  - Dual output safety approvals pending.
  - The negative / positive logic and pin length are optional. The pin voltage is referenced to -Vin.  
Single : Please see single output product options table.  
Dual : Please see dual output product options table.
  - Heat sink is optional and P/N: 7G-0021A-F, 7G-0022A-F, 7G-0023A-F, 7G-0024A-F.
  - The HEC75 meets EN55022 class A and class B only with external components connected with the input pins of the converter.
  - An external input filter capacitor is required if the module has to meet EN61000-4-4, EN61000-4-5.  
The filter capacitor Power Mate suggest: Nippon chemi-con KY series, 220µF/100V, ESR 48mΩ.
  - BASEPLATE GROUNDING : Base-plate should be grounded at one of the four screw bolts prior to operation.
  - The converter is provided by basic insulation.
