

# RG series, ultra-precision & ultra-reliability metal film chip resistors

**SSM**  
THIN FILM TECHNOLOGY

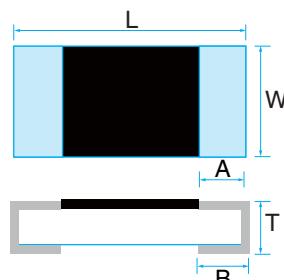

Tight resistance tolerance of  $\pm 0.02\%$  and temperature coefficient of resistance of  $\pm 5\text{ppm}/^\circ\text{C}$  are achieved. Under high temperature and humid condition of  $85^\circ\text{C}$  and 85%RH, and at  $155^\circ\text{C}$ (duration:10000 hours for both tests), superior reliability of only less than  $\pm 0.1\%$  of change in resistance value is realized.

RoHS compliant Completely lead free

- Please contact us for Resistance tolerance  $\pm 0.01\%$ .
- Please contact us for RG3225 series with power of 1/2W
- The stability (reliability) characteristics differ depending on the rated power.
