CLEARER VISION

Safety Eyewear by

Aero **AOSafety**®

ALL ROUND BETTER

HIGH PROTECTION

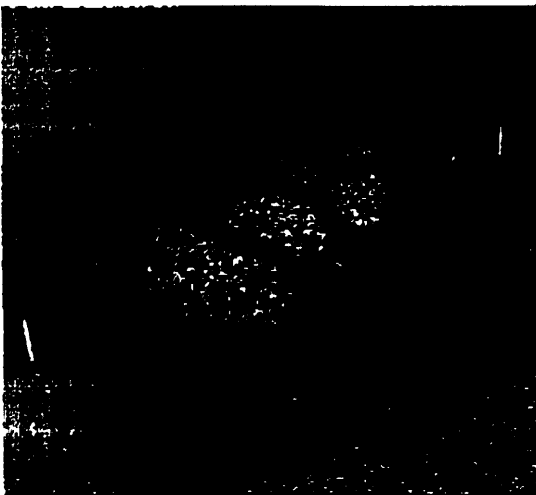

Protecting eyes from liquid splash, dust, grit and other particulates is critical in many environments, but wearing goggles can be uncomfortable for extended wear. Spectacles even with sideshields can't provide the protection of a goggle. The contoured shape of Fectoggles optimizes coverage of the eye area.

CONTOURED TO THE FACE

Instead of the closed-in feeling of goggles, Fectoggles protective eyewear is shaped to follow and flex with the contours of the face. The soft foam flange lines the entire perimeter of the lens to help seal-out particulates and liquid splash, control sweat build-up and increase wearer comfort.

CLEARER VISION

Available in medium and large, Fectoggles combine the sight and comfort advantages of spectacles with the benefits of goggles. So now there's a lightweight, wearer-friendly and effective eye protector for liquid splash and dusty areas.

FULLY ADJUSTABLE

Choose from three different lens positions. Adjustments are quick and easy to make, even while wearing. Fectoggles are available with either a fire retardant, braided elastic band for a snug, comfortable fit or with adjustable temples.

VISION & PROTECTION

EXCLUSIVE REAX® HOOKz™

Eyewear Retention System

HOOZ are fitted as standard to the temple version of Fectoggles. They wrap comfortably around the ear to hold Fectoggles in place and to help provide a custom fit.

COMBINED ADVANTAGE

AOSafety has done it again!! Developed a product that not only meets performance needs but meets the combined advantages of two protection products. Say goodbye to large, view-robbing goggles and to eyewear with less than effective sideshields. Say hello to Fectoggles Protective Eyewear, the lightweight, comfortable and effective way to protect eyes from dust, grit, liquid splash and other particulates.

Innovative "Fectoids"™ Lens Provides Wide, Distortion-Free View.
Many goggles can block and limit a wearer's field of vision. The unique Fectoids lens has absolutely no joins or lines to obstruct or distract a wearer's view. The smooth, panoramic design allows for superior peripheral vision.

Adjustable Lens Angle For Maximum Coverage.

DX™ Coating Resists Misting, Scratching, Static And Many Chemicals.
It's a fact: no other polycarbonate lens coating outperforms AOSafety DX Coating. Lenses stay clear and last longer.

Temple Length Adjusts For Fit And Comfort.

Lightweight And Tough Duralite® Polycarbonate Construction.
The one-piece lens is made of durable, impact resistant polycarbonate and weighs less than many goggles.

Contoured Shape To Optimize Coverage.
Instead of "cupping" the eyes like goggles, Fectoggles™ Protective Eyewear is shaped to follow and flex with the contours of the face.

Foam Flange Seals-Out Particulates Comfortably.
A soft, foam flange lines the entire perimeter of the lens to help seal-out particulates, control sweat build-up and increase wearer comfort.

FECTOGGLES MEET EN166 FOR LOW ENERGY IMPACT, LIQUID DROPLETS AND DUST

WHY NOT TRY THEM AND SEE FOR YOURSELF!

PECTOGGLES™

ORDERING INFORMATION

Packaging: 10 units per box, 5 boxes per case
