

SPE0599

Single -Line ESD Protection Array

DESCRIPTION

The SPE0599 are designed by TVS bi-direction device that is to protect sensitive electronics from damage or latch-up due to ESD. They are designed for use in applications where board space is at a premium. SPE0599 will protect 2-line, and may be used on line where the signal polarities swing above and below ground.

SPE0599 offer desirable characteristics for board level protection including fast response time, low operating and clamping voltage, and no device degradation.

SPE0599 may be used to meet the immunity requirements of IEC 61000-4-2, level 4. The small SOT-23 package makes them ideal for use in portable electronics such as cell phones, PDA's, notebook computers, and digital cameras.
